

George Zorakis

React / Next.js Developer

React / Next.js Developer with 3 years of experience building scalable, performance-focused web applications using TypeScript. Strong in reusable component architecture, API integration, and responsive UI development. Experienced in full-stack delivery and production deployments.

EXPERIENCES

Freelance Web Developer | Self-employed

2025 - Present

- Building production web applications using React, Next.js and TypeScript
- Implementing full-stack features using Convex, authentication, and real-time data
- Designing scalable UI systems with Tailwind CSS and Shadcn
- Delivering end-to-end solutions including deployment, performance optimization, and maintenance

Software Developer | Foundation for Research & Technology (FORTH)

2024 - 2025 | Heraklion

- Developed performance-critical mobile applications for aviation and pilot training systems
- Worked in production environments with strict reliability and quality requirements
- Collaborated with cross-functional teams following clean architecture principles

Web Developer - Designer | Solvit - Freelancer

2023 - 2024 | Heraklion

- Built and maintained responsive web interfaces with a strong focus on performance and usability
- Implemented custom frontend solutions and UI components based on client requirements
- Optimized page load performance and cross-device compatibility
- Collaborated directly with clients to translate business needs into technical solutions

Education

Hellenic Mediterranean University,

Applied Computer Science & Multimedia, 2015
